

My name is Barry Girsh. I have been a Web Designer/Developer for over 10 years in many different industries including non-profits, educational institutions, state agencies, and a variety of commercial agencies. During this time I have had my own Creative Web Services consulting company, MyValueAdd. [See online portfolio @ www.myvalueadd.com.] I am currently focusing on the creation of websites for attorneys and legal service providers.

Please visit the following website to view 5 different prototypes of attorney web sites, all of which vary in price: www.myvalueadd.com/portfolio/law

These 5 are examples of low to high end websites for sole practitioners that I can create for you. These are graphics of the websites' homepage where the links are not functional. If you are interested in any of them, have any questions, or would like to get some costs for doing a site like these please contact me.

These are just 5 examples but if there are any websites that you have seen that you like, please send them to me. If you like what is labeled #2 website, but would really like the question form component in #4 that can be done.

Listed below are a sample of options you can include on your site:

1. Basic Design - Template
2. Custom design
3. 1-5 pages, 6-8 pages, 8+ pages
4. Links to additional pages describing your type of practice
5. Question box
6. Contact form (send email after submit)
7. Directions page with interactive map
8. Blog(s)
9. Custom logo
10. Research and purchase photos
11. Flash animation
12. Content Management System (CMS)
13. Search function
14. Submit site to Search Engines (Google, Yahoo, MSN)
15. Submit Blog RSS to Syndications
16. SEO (optimize meta tags, keywords, and content)
17. Google Analytics (web stats)
18. Google Adword campaign(s)

Thank you for this opportunity. I look forward to working with you on your website.

Barry Girsh, Creative Web Services
